

Our big user stories

1. User account and personalized access - main developer was **Jostin**

- **Register account (main developer: Jostin, Tester: oyinkan)**
As a new student, I want to register with my personal details and password so I can create an account.
- **Login to account (main developer: Jostin, Tester: oyinkan)**
As a returning student, I want to log in securely so I can access my dashboard.
- **Stay authenticated / access protected pages (main developer: Jostin, Tester: Wamiq)**
As a logged-in user, I want protected features to require authentication so my planning data stays private.
- **View my current user/profile information (main developer: Reuben, Tester: Wamiq)**
As a user, I want to view my saved profile details so I can confirm my account information.

2. Course discovery and schedule building.- main developer was **Reuben**

- **Search courses by keyword (main developer: Reuben, Tester: oyinkan)**
As a student, I want to search the catalog for courses so I can find relevant courses quickly.
- **Filter/search courses for a selected term (main developer: Reuben, Tester: Wamiq)**
As a student, I want the search results to reflect the selected term so I only see relevant offerings.
- **View course details / More Info (main developer: Reuben, Tester: Jostin)**
As a student, I want to open a course and see descriptions, sections, and meetings so I can decide whether to include it.
- **Add/remove courses from my current term selection (main developer: Jostin, Tester: Reuben)**
As a student, I want to select and deselect courses before generating a schedule so I can control what gets considered.

3. Program requirements and long-term planning support -main developer was **oyinkan and Wamiq**

- **View faculties and programs (main developer: oyinkan, Tester: Reuben)**
As a student, I want to load available faculties/programs so I can connect my account to the correct academic program.
- **View my program checklist (main developer: oyinkan, Tester: Reuben)**
As a student, I want to see program requirements grouped in a usable format so I understand what I still need.

- **Expand/collapse checklist sections and review requirements (main developer: Wamiq, Tester: Jostin)**

As a student, I want to inspect yearly/elective requirement groups so I can navigate the checklist more easily.

- **Locally mark reviewed/checked courses in the checklist UI (main developer: Wamiq, Tester: Jostin)**

As a student, I want to interact with checklist items while reviewing progress so I can reason through my program path.
